Listing of Claims:

30-36. (canceled)

37. (previously presented) A method of effectively treating pain in humans or other mammals, comprising administering to a patient an analgesic combination consisting essentially of 6-methoxy-2-naphthylacetic acid and/or at least one pharmaceutically acceptable salt thereof; and oxycodone and/or at least one pharmaceeutically acceptable salt thereof such that the dosing interval of the 6-methoxy-2-naphthylacetic acid and/or at least one pharmaceutically acceptable salt thereof overlaps with the dosing interval of the oxycodone and/or at least one pharmaceutically acceptable salt thereof.

38. (previously presented) The method of claim 37, wherein the 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof and the oxycodone and/or at least one pharmaceutically acceptable salt thereof are administered orally.

39. (previously presented) The method of claim 37, wherein the 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof and the oxycodone and/or at least one pharmaceutically acceptable salt thereof are administered in a single oral dosage form.

40. (previously presented) The method of claim 37, wherein the oxycodone would be sub-therapeutic if administered without the 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof.

41. (previously presented) The method of claim 37, wherein the 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof is administered before, simultaneously with, or after administration of the oxycodone and/or at least one pharmaceutically acceptable salt thereof, such that the dosing interval of the 6-methoxy-2- napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof overlaps with the dosing interval of the oxycodone and/or at least one pharmaceutically acceptable salt thereof.

42. (previously presented) A method of reducing the oxycodone and/or at least one pharmaceutically acceptable salt thereof required to treat a patient affected with pain, comprising co-administering said oxycodone and/or at least one pharmaceutically acceptable salt thereof with 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof, to augment the analgesia attributable to said oxycodone and/or at least one pharmaceutically acceptable salt thereof during at least a portion of the dosage interval of said oxycodone and/or at least one pharmaceutically acceptable salt thereof.

43. (previously presented) A method of reducing the amount of 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salts thereof required to treat a patient affected with pain comprising co-administering said 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof with an effective amount of oxycodone and/or at least one pharmaceutically acceptable salt thereof, to augment the analgesia attributable to said 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof, during at least a portion of the dosage interval of said 6-methoxy-2-napthylacetic acid and/or at least one pharmaceutically acceptable salt thereof.

44. (canceled)

45. (previously presented) The method of claim 37, wherein the oxycodone and/or at least one pharmaceutically acceptable salt thereof is present in an amount from about 2.5 mg to about 800 mg.
